## Sample SOP for USA

**"Somewhere, something incredible is waiting to be known."**

The domains of science and technology have tremendously advanced the planet. Science develops the fastest in this context. Science is equipped to provide answers to all of the world's mysteries. It is consistent with the quote mentioned above since it conceals world secrets and waits for the appropriate vision to uncover them. One of the biggest collaborative efforts in human history has been in science, which is still going strong.

My name is Parikshit Nayar, and I belong to Pratapgarh, Rajasthan. I belong to a nuclear family of four, including myself. My father is a headmaster in a school, and my mother is a homemaker. I have an older brother who is currently pursuing Bsc Hons in chemistry.

I've always enjoyed working through mathematical issues and applying the theory to real-world situations. I have always been intrigued by the possibilities of using the theory I learned in class in real-world situations. This helped me decide to enroll in the science program in high school and seek a degree in computer science. At Delhi Public School in Udaipur, I received my secondary and higher secondary education from the Central Board of Secondary Education (CBSE). In my secondary schooling, I received a 74.3%. Given my preference for science courses, I decided to pursue Science-Maths with Physical Education after completing my tenth-grade education. I received an overall grade of 84.2% and an overall XYZ% in the eleventh grade.

## Sample SOP for USA

I actively participated in extracurricular activities. I found writing essays interesting. They are skill-enhancing. I participated in many olympiads and academic competitions. In class 11th, I got 2nd position in the group badminton competition; in class 12th, I got 3rd in the International Mathematics Olympiad.

While growing up, I always observed a lack of awareness regarding diseases. When the COVID-19 pandemic hit the world, I observed the same lack of awareness among people near me. I volunteered and became a part of a coronavirus awareness camp organized by Seva Sansthan in 2021.

After carefully considering my academic objectives personally and professionally, I applied for a Bachelor's in Computer Science at The University of Texas at Austin. Matthew McConaughey, Farrah Fawcett, Renee Zellweger, Felicia Day, and Robert Rodriguez are a few well-known alumni of the university. It is the best public institution in Texas and one of the most well-known universities nationwide. To understand more about informatics procedures and from the top professionals in the field, I wish to get a degree in computer science. UT Austin is the most excellent option for me.

In computer science, the United States is, without a doubt, the world's dominant nation. Many overseas students choose it above other options since it has the resources they need to learn the most. I look forward to learning and growing among the best.

## Sample SOP for USA

My long-term goal is to learn from the courses, attain insights into the computer science industry, and later return to my country. Upon returning, I wish to work with the best organization in the field of computer science.

I hope this statement can support my application to your renowned institution, helping you understand my goals and how I will achieve them through this course.
