“Life is nothing without purpose; no purpose can be bigger than serving humanity.”

I am Simran Sharma, a competent individual with a Bachelor of Physiotherapy (BPT) degree. Being born and raised in a country like India, which has its roots in peace and diversity, it is my highest honour and responsibility to serve my nation in the best possible way.

I have always readied myself in the same manner while carrying this desire. And now, a crucial moment has just arisen: I am eminently close to completing my knowledge gaps and serving my destiny by applying to the Professional Kinesiology programme. I am writing my statement with high hopes in mind to describe why I chose to pursue the Graduate Diploma in Professional Kinesiology at Lakehead University.

I chose to major in physiotherapy for my bachelor's degree because it would allow me to treat patients with injuries and disabilities. This includes generalized conditions like knee osteoarthritis, frozen shoulder, sciatica, cervical spondylosis, etc. I have always been drawn to the healthcare profession that evaluates, diagnoses, and treats to prevent disability.

After completing BPT, I decided to give wings to my dream of serving humanity by choosing the Kinesiology Program. Through extensive research, I learned that compared to other health diploma programs, kinesiology provides the most well-rounded study of the human body, from anatomy and physiology to nutrition and fitness.

I decided to pursue higher education in the Kinesiology Program because I strongly desired to improve my community's healthcare system. I plan to expand my knowledge and enthusiasm to incorporate a holistic approach with Anatomy, Biomechanics, and Psychology principles to help patients' physical mobility by studying the mechanics of human movement.

After extensive research, I concluded that Lakehead University in Canada is the ideal place to get a diploma in kinesiology because it offers a striking, futuristic, and highly practical curriculum and has great academic standards.

After completing the programme, I want to return to India to continue looking for a job in potential hospitals. Kinesiologists are being hired in large numbers by numerous hospitals in India. This pattern can be seen at many of India's major hospitals, including Fortis Hospital and Max Super Speciality Hospital. I plan to achieve my goal of becoming one of India's top kinesiologists along the route. With this curriculum and the transferrable skills in my skill set, my career would increase enormously.
